Capability Statement

https://altor-grc.com

Altor-GRC, Inc. was founded in 2020 as an expanded platform offering from the Build now at TRL8 Certino.com with clients in the global mobility industry by automating international payroll since 2017. We are seeking contracts for multi-country payrolls while building AltorGRC's Data Enclave® Formulary which includes integrated Cyber Resiliency for ALL related risk topics from; end point, applications, integration to data storage. Current models are overly complicated with unknown gaps, duplication and silo-ed. Yet due to the Altor approach configuration and accountability becomes simplistic. This affords AltorGRC the ability to structure and define its own growth road map in a very predictable criteria driven process that is agnostic. It's about the data NOT the systems.

Altor-GRC, Inc. is integration based with benchmarked 3rd party options so that a client's enterprise has aligned accountabilities, in the entire supply chain via our Enclave Union™.
